

Computer Applications, using the book "Visualizing Technology, 10th Edition."

Module One:

Types and Uses of Business Productivity Software.

Office Application Suites

- include several applications designed to work together.
- Enable Collaboration
- Saves Files in multiple formats.

Word Processing

- Creates, edits, Formats documents
- ↳ Formats texts, spelling/grammar checks, insert/format images, tables/lists, headers/footers/numbers/margins, generate mail labels.

Spreadsheet Application

- Creates electronic worksheets composed of rows and columns.

The intersection of a row + column is a cell, Statistical analysis tool, Creates charts or graphs, Sorts/Filters/Rearranges data, customizable.

Presentation Software

- Creates electronic presentation
- Format slides using Fonts, layouts, colors.

Database Application

- Creates and manages a collection of related records organized into one or more tables.
- Record: Contains info about a single entry.
- Field: Single piece of info in a record.

Personal Information Manager (PIM)

A PIM manages your email, calendar, contacts, and tasks in one place.

Other Software

- Financial Software

↳ Keeps track of expenses/taxes, tracks invoicing/payroll/inventory, generates reports/graphs, helps in decision making.

- Document Management System (DMS)

↳ Files stored on a server or the web.

- Project Management Software

↳ Helps complete projects within budget, on schedule, and allows collaboration.

- Customer Relations Management System (CRM)

↳ System for maintaining customer

Types and Uses of Personal Software

Personal Office Applications

- Individuals can choose between Commercial/Open-Source Software.

Commercial: Expensive, Sold as Suites or individual applications.

Open-Source: No Fee, public, Customizable.

Online alternatives for apps are available

Finance/Tax Preparation

- Track a bank
- Monitor Investments
- Create/Balance a budget
- File income taxes

Entertainment and Multimedia

- Video and Photo Editing Software
- Media Management
- Video Games

Educational and Reference Software

Trip planning, Genealogy, monitor exercise, home design, etc.

Assessing System Requirements

System Requirements: Minimum hardware/software specifications the computer must meet to run an application. These are listed with products.

Where to get Software Licensing

• **Proprietary license:** ownership remains with software publisher, most restrictive with installation/distribution.

- **Open Source License**: grants ownership, source code available, modifiable/redistributable.

Free or Paid

- **Retail**: user pays fees to use software.
- **Subscription**: Monthly/yearly fee
- **Freeware**: Used at no cost
- **Shareware**: try before you buy
- **Donationware**: Devs accept donations
- **Freemium**: Basic mobile apps

Sources of Software

Desktop Application: computer application installed on a computer with an OS.

App: Self Contained program made for a single purpose

Web-Apps: Run in browsers.

Cloud Computing

Cloud = Internet

↳ takes processing and storage from a desktop and puts it online
Companies known as Cloud Service Providers (CSP).

↳ IaaS, PaaS, SaaS

Infrastructure as a Service (IaaS):
Use servers in the cloud

Platform as a Service (PaaS): provide an environment to develop, test, and deploy custom web apps.

Software as a Service (SaaS): Applications delivered over the internet.

Install, update, Uninstall Software

- Install: Copies files to a computer

- Update: Adds features, fixes bugs, etc.

- Uninstall: Properly remove software files.
