

Module Two - File Management

A place for everything

- **Folder** - Container used to organize files

- **Path** - Sequence of folders to a file or folder

- **Library** - helps organize content by gathering files from different locations
 - ↳ Documents, music, pictures, videos, etc.

Windows

File Explorer - Used to navigate a file system in windows.

- ↳ Searchbox, Ribbon, File list area, address bar, Navigation pane, Content pane.

Mac

The Mac user folder includes subfolders to store: documents, downloads, movies, music, pictures

Mobile Devices

- ↳ Portable, Fast + light with limited storage: Use cloud, SD cards.

Creating and Using Folders

Folders can be created in the Save as dialog box.

They can be stored on flash drives or the cloud.

A good folder scheme enables the quick retrieval of a file.

File Names and Extensions

File names are two parts; Name + extension.

- ↳ They can be up to 260 characters.

- ↳ They may include spaces + special characters, except: \, /, ?, :, *, " , > , < .

File Extensions and Default Program Association

Extension	File Type	Program Association	
		Windows	Mac
.docx	Word document	Word	Word
.rtf	Rich Text Format Doc	Word/Wordpad	TextEdit
.pages	Pages Document		Pages
.xlsx	Excel Workbook	Excel	Excel
.pptx	PowerPoint	Powerpoint	Powerpoint
.bmp	Bitmap Image	Paint	Preview
.jpg/.jpeg	Img (Joint Photo Experts Group)	Photos	Preview
.mp3	Audio (Moving Pictures Experts Group Layer III)	Groove	itunes
.aac	Audio (Advanced Audio Coding)	itunes	itunes
.mov	Video File	Groove	Quicktime
.pdf	Portable Document Format	Edge	Preview

File Properties

Organize, sort, and find files easily.

Automatically created, include file type, size, and date. Title and author can be added by user.

Backing Up Files

- Windows File History • To the Cloud
- Mac's Time Machine • Commercial Software
- External Hard drive

Cloud Devices: Dropbox, Google, iCloud, OneDrive.

Working with File Compression

Process of making files smaller

↳ Conserves space, easier transfer

Types of Compression algorithms

↳ Lossy, Lossless

Windows uses Zip format, Macs use Compress or File menu.

↳ popular compression programs: 7-zip, WinRAR, Winzip, Stuffit.

Use Advanced Search Options
Using windows to search for files

- Settings window
- Control Panel window
- File Explorer window
- Cortana - windows assistant

Searching in MacOS
Search in OSX

↳ Search in Finder, help
Center Search

Spotlight: accessed through
magnifying glass, search files, folders,
contacts, and other objects.
Siri, Apple's assistant

Use Boolean Logic

Boolean Logic created in 19th
Century by George Boole
Boolean Operators:

- And: includes both words
- Or: includes either word
- Not: includes first but not second word

Used to create search filters
in windows, most databases, and
web searches

Change the Default Program associated
with a File Type.

Default Program - Application
associated with a file through its
extension → allows you to open, view,
edit the file in the program used
to create it.
